I-SPY 2: An Adaptive Breast Cancer Trial Design in the

Clinical study design is the formulation of trials and experiments, as well as observational studies in medical, clinical and other types of research (e.g., epidemiological) involving human beings. The goal of a clinical study is to assess the safety, efficacy, and / or the mechanism of action of an investigational medicinal product or procedure, or new drug or device that is in development ...

Objectives. Discuss issues regarding clinical trial design for the development of biosimilars in the European Union and the United States, with special focus on monoclonal antibodies used in the treatment of inflammatory diseases.

Clinical trial development for biosimilars - ScienceDirect

Clinical trials are experiments or observations done in clinical research. Such prospective biomedical or behavioral research studies on human participants are designed to answer specific questions about biomedical or behavioral interventions, including new treatments (such as novel vaccines, drugs, dietary choices, dietary supplements, and medical devices) and known interventions that warrant ...

Introduction. Even though personalized oncology is widely perceived as an imminent reality, few anticancer

drugs are currently prescribed based upon predictive biomarkers .Moreover, despite outstanding advances in molecular biology, the clinical development of most anticancer drugs is still based on conventional randomized studies that aim to detect statistically significant clinical benefits ...

Strategies to design clinical studies to identify

Tools. Investigators are strongly encouraged to consult with the Study Design and Biostatistics Core, which provides FREE consultations to those planning to conduct or currently conducting clinical or translational research. Drop-in sessions for study design and statistical analysis consultation are held every Tuesday, from 11 am – 12 pm.
