An Advanced Encryption Standard instruction set is now integrated into many processors. The purpose of the instruction set is to improve the speed (as well as the resistance to side-channel attacks) of applications performing encryption and decryption using Advanced Encryption Standard (AES). They are often implemented as instructions implementing a single round of AES along with a special ...

Earth-abundant, two-dimensional (2D) Ni-based metal organic framework (MOF) nanosheets serve as a versatile and highly active platform supporting metal sulfides for highly efficient, visible-light photocatalytic H₂ production. The advanced characterizations and theoretical calculations confirm that the interfacial electronic coupling, large surface area, numerous reactive centers ...
