A steel detailer is a person who produces detailed drawings for steel fabricators and steel erectors. The detailer prepares detailed plans, drawings and other documents for the manufacture and erection of steel members (columns, beams, braces, trusses, stairs, handrails, joists, metal decking, etc.) used in the construction of buildings, bridges, industrial plants, and nonbuilding structures.

Steel is an alloy of iron and carbon, and sometimes other elements. Because of its high tensile strength and low cost, it is a major component used in buildings, infrastructure, tools, ships, automobiles, machines, appliances, and weapons.. Iron is the base metal of steel. Iron is able to take on two crystalline forms (allotropic forms), body centered cubic and face centered cubic, depending on ...

Structural Considerations for Solar Installers

Start with the yield stress of your material. For example, consider A36 structural steel. The yield strength is 36000 psi = 36 ksi. Take 60% of this for starters, so an allowable stress = $0.6 \times 36 \text{ ksi} = 21.6 \text{ ksi}$.

State Building Codes. When embarking on a building project for a new home, backyard building, prefabricated steel building or small building kit, it is important before you start building you ensure that you meet all the building codes for your state or city. Failure to do so can result in a suspension of your building permit until you comply with all codes for your state or city.
