Rubella is a virus that causes an infection that is usually mild and characterized by fever and rash that last about 2 to 3 days. The Infection is highly contagious but is preventable with a vaccine. A rubella test detects and measures rubella antibodies in the blood that are produced by the body's immune system in response to

immunization or an infection by the rubella virus.

Heavy metals are generally defined as metals with relatively high densities, atomic weights, or atomic numbers. The criteria used, and whether metalloids are included, vary depending on the author and context. In metallurgy, for example, a heavy metal may be defined on the basis of density, whereas in physics the distinguishing criterion might be atomic number, while a chemist would likely be ...
