

motor learning and control pdf

Motor control is the systematic regulation of movement in organisms that possess a nervous system. Motor control includes movement functions which can be attributed to reflex, and to volition. Motor control as a field of study is primarily a sub-discipline of psychology or neurology.

Motor control - Wikipedia

For every motor, some form of electrical control is required, from simple ON/OFF to more complex variable speed applications. Motor control devices encompass simple manual controllers, motor contactors and starters, drives and soft starters.
