

swarm intelligence and bio pdf

Swarm behaviour, or swarming, is a collective behaviour exhibited by entities, particularly animals, of similar size which aggregate together, perhaps milling about the same spot or perhaps moving en masse or migrating in some direction. It is a highly interdisciplinary topic. As a term, swarming is applied particularly to insects, but can also be applied to any other entity or animal that ...

A herd is a social group of certain animals of the same species, either wild or domestic. The form of collective animal behavior associated with this is referred to as herding.. The term herd is generally applied to mammals, and most particularly to the grazing ungulates that classically display this behaviour. Different terms are used for similar groupings in other species; in the case of ...

Un essaim est un rassemblement en nombre important d'insectes de la même famille. Il correspond à un comportement d'agrégation. Le phénotype ne dit de « nuée » ou « tempête d'insectes » n'a pas d'origine chronologique directe mais est saisonnier et est lié aux épisodes de sécheresse et de pluie qui font varier la quantité de nourriture disponible pour les insectes.
